#### Present

Robert Andres — Eurotech (alternate)  
Caroline Buck — Bosch  
Frédéric Desbiens — Eclipse Foundation  
Hassan Jaber — Eclipse Foundation  
Jens Reimann — Red Hat

#### Absent

Marco Carrer — Eurotech

### Minutes

**1. Adopt the minutes of the March 22, 2021 call**

The minutes of the March 22, 2021 call were approved unanimously.

**2. Internship Program follow-up**

Frédéric Desbiens reported to the committee that Eclipse IoT members did not submit any sponsorship offers or development initiative proposals by the April 23, 2021 deadline.

After discussing the situation and its causes, the committee decided to relaunch the program this fall, since this will give time to members to take their financial contributions to the program into account while planning their 2022 budgets.

**3. Marketing update**

Hassan Jaber presented an overview of recent and upcoming marketing activities.

The Eclipse Marketing team is currently heavily promoting the [Virtual IoT and Edge Days 2021 conference](#), scheduled for May 26 and 27.

**4. Working Group Charter scope and vision**

The committee reviewed the proposed scope and vision statement for the new Eclipse IoT charter drafted by Caroline Buck and discussed various comments made on it. The members of the committee declared themselves satisfied with the scope and vision statement at the end of the discussion.

**5. New membership level**

The committee discussed the new membership level and other aspects of the new version of the Eclipse IoT charter required to implement it.

The committee decided to revisit the membership fees for the new “Innovator” level at its next meeting in May. It is expected a final draft of the new charter will be produced at the next meeting.

**6. 2021 IoT and Edge Commercial Adoption Survey**

Hassan Jaber briefly presented a deck illustrating the raw data of the 2021 IoT and Edge Commercial Adoption Survey. Access to this deck is reserved to strategic members of the IoT, Edge Native and Sparkplug working groups.
